Digival's Technology Framework for Outcome / and Competency Based Education

- Standardizing Learning Environment and Human Resources
- Standardizing the requirement of curriculum and Syllabus
- Standardizing the outcome based learning and teaching
- Standardizing the continuous quality improvement & revenue growth
- Standardizing the outcome based assessment - direct and indirect

Our Training

We Conduct training for education institutions to prepare for accreditation and re-accreditation procedures

The Digival team can provide contractual training on end to end concepts in outcome and competency-based education and assessment systems for all the stakeholders in higher educational institutions.

- Quality Assurance and Accreditation
- Curriculum Development and Course Design
- Student Assessment
- Teaching and learning

Quality Assurance and Accreditation

Digival's quality assurance experts team train the stakeholders of institutions in the quality assurance process to meet the standards and criteria of concerned national and international accreditation agencies. It provides them hands-on experience on the various components such as plan, implement, monitor, review, report, audit, analysis, evaluation, and improvement of quality assurance cycle. The training helps them to develop and analyse policies, procedures, tools, metrics, and indicators.

Curriculum development and course design

Digival assists higher education institutes with designing and developing the courses and programs for the physical, online, and hybrid learning environment. A university is defined by the curriculum they provide to their students, which is why formulating the proper curriculum and courses are necessary. Our experts ensure that program and course learning outcomes, content and its level, learning ecosystems and resources, training and its assessments meet the expectations of relevant industry standards.

Student Assessment

Digival's experts team trains universities and colleges in developing quality student assessments. Our training enables administrators and academicians to develop and evaluate quality outcome and competitive based assessments at the level of recall, comprehension, application, analysis, evaluation, and synthesis. We provide training to staff members on conduction of onsite and remote formative and summative assessments using DigiAssess platform.

Teaching and learning

Digival's experts have immense experience in developing innovative learning and teaching strategies and technologies to provide quality learning experience for students to achieve the learning outcomes. Our experts can train the academicians of various age groups to use technologies in designing and teaching their online and hybrid courses and programs

" CEO Promise

Happy Clients "

"Digival provides quality products and solutions in a cost justified manner that exactly fit the educational institutions to deliver quality programs and achieve their expected outcomes. As a leader of Digival, I promise we fulfill your expectations by integrating and synergizing with your institution and stakeholders for successful implementation and provide continuous empathetic support"

Dr. Abdul Aziz Al-Yahya
Digival is a team of academic and quality assurance experts able to understand the institution needs and customize the technology to fit the institutional process. Digival adapted and implemented our requests and I really recommend their solutions. I hold accountable for these words.

Dr. Othman Wali
Digival Solutions offers products that are highly secure for students and faculty, Digival provides customized solutions for your university or college. I recommend Digival products to successfully manage educational activities in your college.

Dr. Syed Mukheet Ur Rahaman
Working with Digival Solutions was a jaw-dropping experience! They gave us simple solutions and drastically reduced our time to plan. Digiassess, Digischeduler, and Digiclass converted the complex process involved in learning, teaching and assessment into simple and smart. Digival really made a big difference in improving the quality of our college.

Ms. Khamrunnisa Hussain
Digival Solutions provides an inside view of how things work from a quality perspective. Digival products and solutions offer insights that help maintain NCAAA standards and make quality assurance personals and administrator's jobs easy and hassle-free.

Dr. Hani Salem Mohamed Atwa
I can firmly say all the exam management softwares in the market are not designed for Saudi Arabia (KSA). But the Digiassess is designed especially for KSA's educational system and fit easily in outcome/competency based education. Digiassess enhances the quality of assessments, and highly secured system. Digiassess makes the stakeholders of assessments to adopt easily, and the entire Digival's team take care of institution's concerns and solve all the implementation issues, which made Ibn Sina National College to change from the existing assessment software to Digiassess.

Dr. Suban Mohammed Gouse Saleem
