# INTRODUCTION

## About Digival

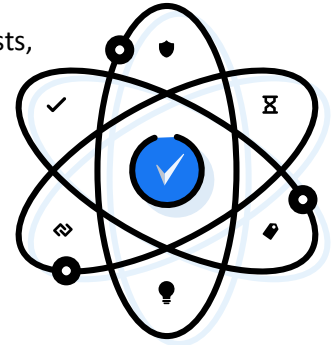

Digival is a technological company founded by grit-driven, well-experienced strategists, quality assurance consultants, academicians, physicians, and technical experts.

### Our mission

To be the world's No.1 learner's centric technology company by building unified learning, teaching, and assessment platform to deliver quality programs at scale and achieve learning outcomes by providing a highly stimulating and engaging learning experience.

### Our Core Value

The entire team is driven by Digival's core value, "Empathic Concern." The team has an unshaken belief in our core value being pivotal in guiding our team to strive in line with Digival's vision, mission, and goals.

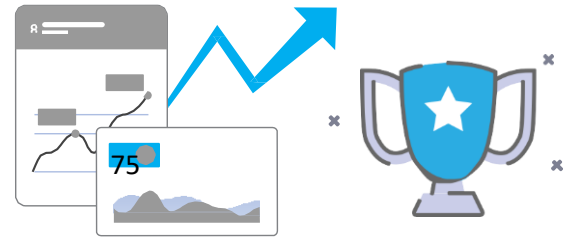

## What can "Digival" do for Educational Institutions?

Using Digival's technological framework of outcomes and competency-based education helps institutions plan, implement, monitor, and improve their educational process and quality of programs to enhance students performances and assure students achievement on learning outcomes & competencies. This technology solution is robust, flexible, personalized, and comprehensive. In addition, it can be unbundled to integrate into the existing technology of higher educational institutions.

### Our Solutions for the framework

-  Outcome-Based Education Solution
-  Curriculum Management Solutions
-  Classroom and Learning Management Solutions
-  Assessment Management Solutions
-  Accreditation Management Solutions

## How do we differ from others?

- We tailor technology to match your process.
- We digitize and personalize the Curriculum and syllabus.
- Optimizing resources around the Curriculum.
- We measure learning outcomes.
- We provide tools to identify & address learning outcome gaps.
- No need for experts to work on quality metrics.
- Best user experience – Mobile & AI interface.
- Personalizing security & empathetic support.
- Transformation becomes smooth & happy

## Unified Academic Management System

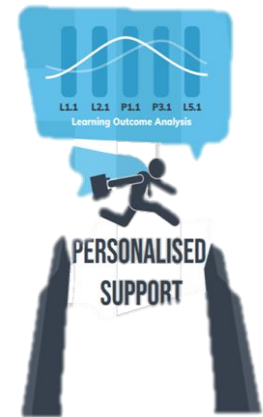

We digitally transform learning, teaching and assessment process...

**T**racking & Monitoring Of Curriculum Deliveries In Real-time.

**L**ongitudinal Analysis Of Students Progress On The Learning Outcomes.

**D**ata-Driven address of learning outcomes gaps through personalized learning support.

**B**ringing transparency and accountability in the governance of program administration in learning, teaching, and assessment standards.

**C**onverting Distractive and destructive mobile and web-based learning experience into stimulative, collaborative, Participating, motivating, rewarding, and engaging learning experience.

To assure academic quality

... to deliver quality programs for making competent and employable graduates.

## Overview of products

Our products enable colleges to deliver quality programs and achieve learning outcomes.

We tailor the Digival's products to fit your institution process.

### **DigiClass**

Digitize the curriculum, map the learning outcomes, automate the students' grouping, academic scheduling, attendance, leave, warning, management process. It assures quality learning at the onsite and remote classrooms, identify, and addresses the learning outcome gaps drive towards personalized learning; ultimately makes the administrators track and monitor the curricular deliveries in real-time.

### **DigiAssess**

Digitize the assessment management process and workflow, smart and intelligent question bank, minimal dependency on the internet, face recognized & secured assessment system, interactable reports, and analytical system, ability to do the direct and indirect measurement of course and program learning outcomes, reduces the time and removes the need of an expert to manage, evaluate and analyse the quality of assessment.

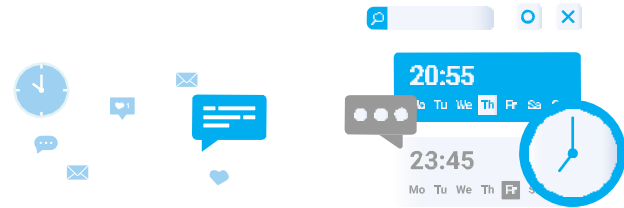

*"Digival's products and solutions enable the educational institutions to achieve the learning outcomes by assuring the quality process of learning, teaching, and assessment in all courses and programs as per the accreditation standards."*

## DigiClass - Admin

Digitizes and automates the delivery of curriculum to track and monitor in real-time.

### How Does DigiClass Benefit Colleges and Universities?

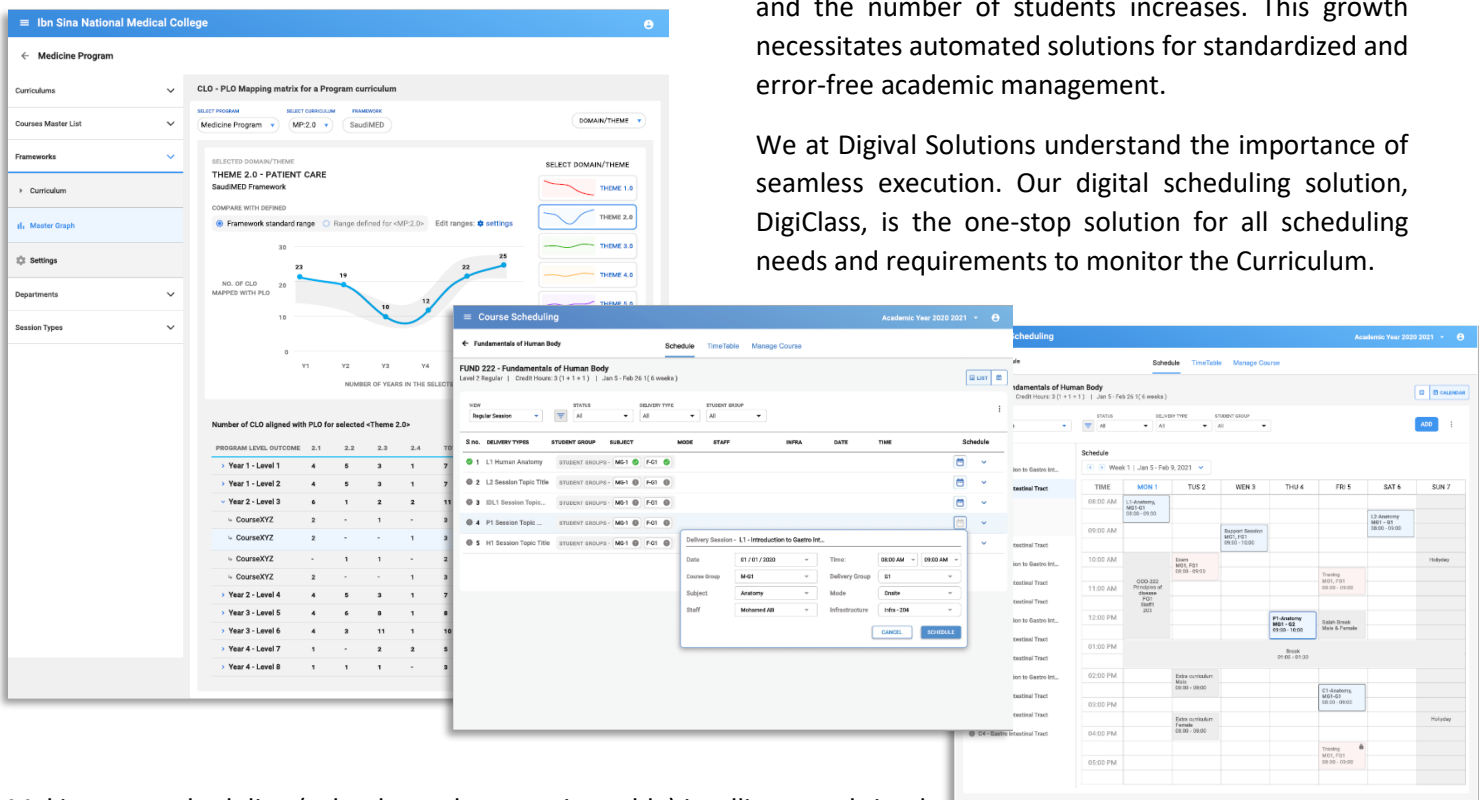

- DigiClass offers the dual benefit of automation and customization to plan, track and monitor the Curriculum in real-time.
- Customization and personalization of products cater to course specific scheduling requirements.
- DigiClass can be adapted quickly at the university's programs and course level.

Administrative efficiency is an essential aspect of professional academic management. For example, planning an academic calendar requires precision and time.

Additionally, curriculum management involves several tasks like maintaining attendance records, course plans, and learning outcomes. Finally, standardized academic process help institutes in getting national and international accreditation.

As an institute grows, the number of programs it offers, and the number of students increases. This growth necessitates automated solutions for standardized and error-free academic management.

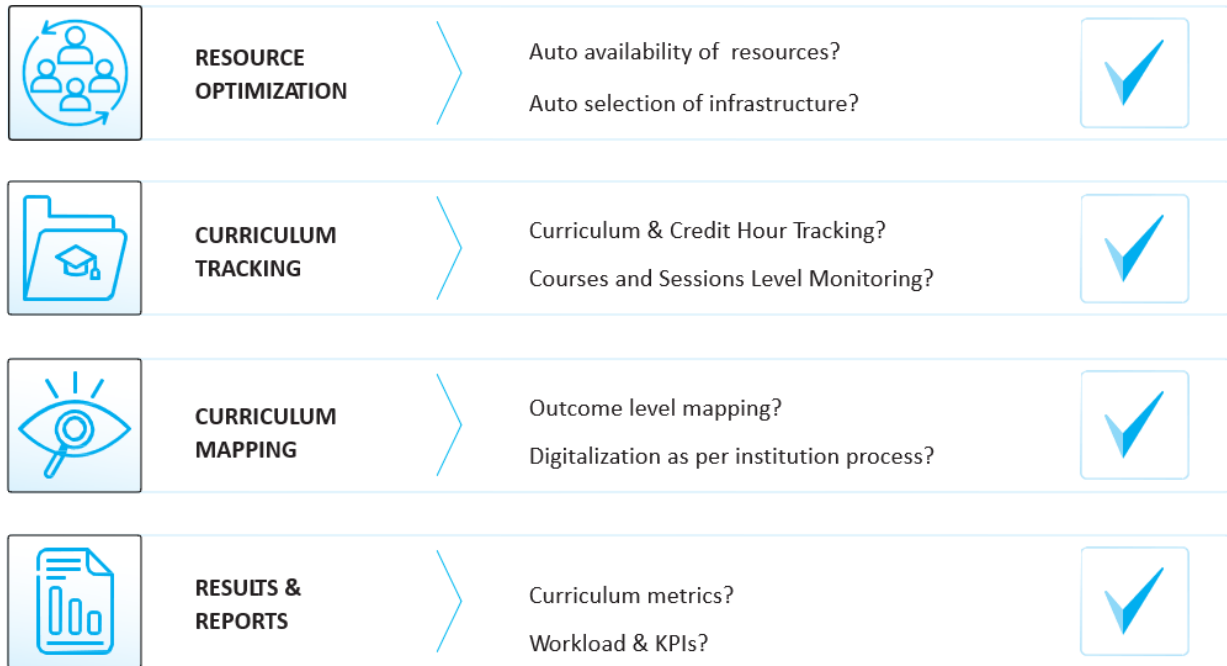

We at Digival Solutions understand the importance of seamless execution. Our digital scheduling solution, DigiClass, is the one-stop solution for all scheduling needs and requirements to monitor the Curriculum.

Making your scheduling (calendar and course timetable) intelligent and simple

Intelligence in tracking & Monitoring of Curriculum enhances the quality delivery of programs & courses.

## How does it work?

## DigiClass Unique Features and Specifications

### Process Automation according to your institution

An Academic calendar is a tool for collaboration between the institute and students. It communicates the academic plan for the year. At times, you may need to make edits to the academic calendar and send it to the programs, students, and faculty.

#### General Settings

- Institutions Input
- Super admin settings
- Security Settings
- Server Settings
- API Integration Settings
- Notification Settings
- Email Message Settings

### Maximizing infrastructure utilization

The system will automatically generate reports about utilizing all the university's physical resources from training labs, classrooms, testing labs, etc.

#### Infrastructure Management Module includes:

- Infrastructure Configuration
- Hospital Configuration
- Lecture, labs, and Clinic Configuration
- Multiple location Configuration
- Gender Segregation
- Delivery mode Configuration

## Live tracking and monitoring of all curricular activities

Maintain records of curriculum metrics for audits and accreditations. For example, it monitors credit structure and hours and calculates credits and hours for every program, course, and session.

Reports and Analytics to monitor

- Staff Workload
- Staff data analysis
- Student Workload
- Leave Reports
- Infrastructure utilization Reports
- Credit hour and Contact hours Distribution Report
- Course execution Report (includes cancelled, merged, postponed data)

## Auto scheduling based on session flow (Syllabus)

Align the curriculum mapping of each course with the learning outcomes. Management can create customized workflows across programs and create a customized lesson plan or select from auto templates on the system.

Course Scheduling Module includes.

- Topics Configuration
- Session level groupings
- Multiple year scheduling
- Repeat scheduling for Rotations.
- Auto-availability of Staffs & Infrastructure
- Merge sessions
- Alter session flow.
- Extra Curriculum and students support sessions addition.
- Holistic weekly view
- Credit-Contact hours validation

## Personalized alerts and notifications

DigiClass sends alerts to the concerned stakeholders in the event of any changes to the academic calendar. Instead of spending all their time on the phone, your administrative staff can focus on other significant activities. You can publish add-ons and special events.

Students can view the timetables on their dashboards on a real-time basis. Similarly, students and staff receive alerts and notifications about assignment submission deadlines, grades released, events, and more. In addition, the reports help the academic staff to track students' academic and extracurricular activities.

## Student database and academic grouping

DigiClass gives the management a bird's eye view of the student database. The system allows universities to assign students to any program, semester, and course. Once you enter student details, DigiClass can group students based on set criteria. However, the administrator can manually swap, add, and remove students from an academic group. You can also import student groups across courses.

Students Group Management Module include:

- Import and Export of Students
- Auto-grouping Students
- Year level grouping for Rotations
- Course level grouping for Sessions
- Manual override

## Auto templates & auto selection for Course Management

The system allows for curriculum mapping of all the courses against the learning outcomes. In addition, the management can create customized workflows across programs. For example, instructors can create a customized lesson plan or select from auto templates on the system.

Allow modifying the plans at any point.

The Auto templates and auto selection save time.

## Curriculum metrics

Maintaining records of the curriculum metrics is vital for audits and accreditations. DigiClass monitors credit structure and hours.

Allow calculating credits and hours for every program, course, and session.

DigiClass streamlines administration and boosts productivity.

## Leave management

DigiClass has features to manage students and staff leave, permissions, and on-duty tasks like scientific conferences, sports events, and so on.

The absences, permissions, and on-duty applications are processed based on the institution's workflow.

The automated features allow applicants to apply only the accepted entitled number of absences, permissions, and on-duty work. If a staff member applies for leave, the department head can easily reschedule the sessions in a few clicks. DigiClass-Admin interacts with DigiClass-Execute mobile & web application involves in execution of planned curriculum and maintains the real-time data of the student and staff attendance register.

Leave Management Module to include:

- Staff Leave Management
- Staff Replacement System
- Staff Register
- Students Leave Management
- Students Register
- Leave Criteria & Denial Management
- Leave policy Configuration.
- Evidence attachment
- Review and Approval process

## Human Resources Optimization

An educational institute runs many programs, electives, and projects. Therefore, we understand that your staff needs to multitask.

- You can assign tasks to your staff and monitor the work on a single platform.
- The management can check on the availability of every staff member through DigiClass. Beyond academic control and mapping, DigiClass helps in staff workload balancing.
- DigiClass prevents scheduling conflicts.
- Student and staff attendance and leave management system is another feature of our DigiClass.

## Easy registration

We provide a user-friendly platform for your scheduling activities. In addition, we use face recognition mechanisms for registering users. So, there will be no extra operational cost and time once you are on board with us.

*Technology has penetrated every aspect of our life. The proper integration of technology in the Educational Process can save time and money with no more scheduling hassles. DigiClass by Digival Solutions covers every aspect of scheduling activity in all levels (College level, Program level, and Courses level) in a well-integrated and synchronized manner as per the institutional and program policy – All happens in a few clicks!!*

## DigiClass – Execute

Attendance automation and addressing learning gaps to assure quality learning in onsite and remote environments.

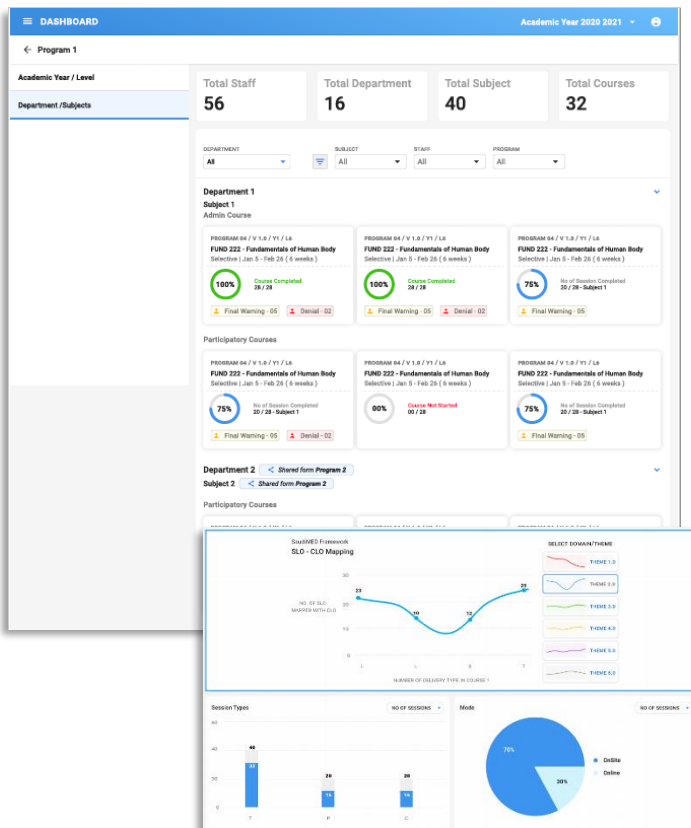

### How Does DigiClass Benefit Colleges and Universities?

Most universities and colleges offer onsite & online classes and courses to use both time and technology in educating students effectively. But how easy is it to monitor these classrooms? How can the college administration, faculty, and staff be sure that each student makes full use of these classroom sessions?

What is required is the software to cater to both onsite and remote digital classroom management. And that is Digival's digital classroom solution for Higher Educational, DigiClass.

DigiClass is an intelligent classroom management system that measures the student and staff's performance to assure quality learning in the onsite and remote learning environment. It makes your classroom smarter to ensure quality learning at the level of theory, practical and clinical sessions. The mobile-based technology with an intuitive user experience interface provided new age technology-enriched learning experience. The learning experience using DigiClass makes the students more engaging and active participation in the process of learning.

## DigiClass – Make your classroom smarter

Tracking and monitoring all curricular activities (theory, practical, and clinical sessions) in all programs and identifying students' performances on learning outcomes and staff members accountability in real-time.

How does it work?

	<b>TAP ONE BUTTON</b>	Quick & easy attendance? With zero fraudulence?	
	<b>HOST ASSESSMENT</b>	Outcome based? Measures! Feedback?	
	<b>COLLABORATION</b>	Group Discussion? Feedback and reflection?	
	<b>PRE AND POST CLASS</b>	Able to conduct pre-test? Content sharing?	

## DigiClass Unique Features & Specifications

DigiClass is an intelligent classroom management system to assure quality learning in the classroom setup. It is software to cater to both onsite and remote digital classroom management.

Automation in the attendance using face detection within less than 60 seconds.

It takes 10 - 20 minutes for teachers to take their attendance before they start to teach. Our solution reduced that to just 60 seconds using face recognition to ensure the students' identity attending the sessions.

- Onsite – Staff & Students attendance system
- Remote – Staff & Students attendance through the web application
- Real-time data sharing of attendance

Enhancing student engagement through Chat, and Discussions (Add-on Module)

Arranges group discussions for brainstorming ideas and chat sessions for clarifying doubts.

Collects real-time responses and gives immediate feedback.

Peer Discussions, Chat & Forum Discussions

- Conduction of pre-test
- Notes sharing
- Post-class assignments
- Post-class discussion and notes sharing

## Hassle-free integration with web conferencing tools

Uses video-conferencing tools like Zoom to interact with students. Seamlessly blends with the university's learning management system (LMS). In DigiClass, we can integrate with any web conferencing tools such as

- Zoom Meetings
- Microsoft Teams, etc

## Classroom assessment mapped with learning outcome

Monitor student learning outcomes and prepare individual reports. Measures delivery engagement through the score, attendance, and other factors, and it also provides details of staff engagement in each class.

Classroom and homework Assessments (Quizzes)

- Conduction of formative assessment
- Outcome-based analysis
- Immediate sharing of results
- Identifying the weak performer

## Enables total management of the digital classroom

A physical classroom is a multi-faceted space with teachers, students, lessons, questions, answers, etc. Managing this classroom is a challenge for any institution. It has many tasks like scheduling classes, monitoring attendance, ensuring entire student interaction, and more. The institution must assess class performance by checking the course content. Finally, colleges usually should prepare reports to judge the effectiveness of the online class. The tasks are many, but DigiClass does them all. From sending notifications to organizing the information, DigiClass handles everything.

## Easy student login through Face-ID

The facial identification (Face ID) login is one of the best features institutions receive with DigiClass. With this instant login, there is no chance of any malpractice from any of the users. It minimizes the possibility of fraudulent or illegal entry. With this fool-proof facility, DigiClass offers credible and reliable data.

## Analytics-based personalized learning through robust feedback

Collects real-time responses and gives immediate feedback. In addition, it helps the institution track all chat logs by storing them on the cloud. And many other Reports and Analytics that helps in monitoring the performance of each student include:

- Reports on students learning.
- Information on student's attendance
- Immediate sharing of results

## Possibility of continuous Support and engagement by staff

Improve student interaction in the classroom through quizzes. Allows you to use the classroom better and even track the staff's presence in the class.

Pre & Post Class Management

- Conduction of pre-test
- Integration of schedule
- Documents & notes sharing

## Easy evaluation of the student or staff performance through AI-metrics

An institution must monitor every aspect of the online class, and DigiClass helps them do this by monitoring student learning outcomes and preparing individual reports. For example, DigiClass measures lecture engagement through a score, attendance, and other factors while providing staff engagement details in each class.

Real-time Monitoring of Students and Staff Accountability

- Session monitoring – late, postponement, merging
- Addressing learning gaps
- Personalized learning opportunity

## Maximizes interactions in classes

Unlike online classes, physical classes enable teachers to pay attention to each student face-to-face - DigiClass repairs this shortcoming in many ways. DigiClass improves student interaction in class through its classroom quiz app. It arranges group discussions for brainstorming ideas and chat sessions for clarifying doubts. As a result, students will feel like they are in the university even when they are not.

## Assignments & Evaluation with Rubrics

Monitor student learning outcomes and prepare individual reports. It supports conducting Regulated Formative & Summative Continuous Assessments.

- Conducting Formative & Summative Assignments with the approach of Scientific Evaluation with Parameter Based & Outcome Based using Rubrics.
- Learning Outcome mapping can be configured either by SLO or CLO
- Anonymous Evaluation of Students for fairness in Assessing and flexibility for Multi-Staff Evaluation for Single Assignment.
- Supports evaluation in various options like Manual, Rubrics, Rating & Checklist.

## Mobile Based Learning

With our native mobile app, students and teachers can conduct course sessions and do all the activities in an ingenious and easy way.

- Single Staff Sessions
- Multi-Staff Sessions
- Course & Session Flow-based Learning
- On the fly access of Learning Resources
- Announcement Notifications to Students & Faculties
- User Feedbacks
- General Survey

*Smart classrooms have harnessed technology to offer cutting edge to onsite and remote classes. Still, institutions can only make the most of the digital classrooms with DigiClass by DigiVal. DigiClass is the ultimate tool for managing onsite and remote classes. It helps students, teachers, and institutions make the most of digital classrooms.*

## Digital Transformation Journey and Commendation from the Accreditation Body for implementing DigiVal Products at the Ibn Sina National College for Medical Studies

هيئة تقويم التعليم والتدريب  
Ministry of Education & Training Accreditation & Commission

### Commendations

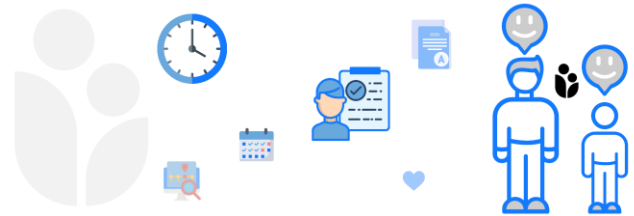

The Review panel feels that ISNC should be commended for customizing the Digi-Val system to allow for continuous evaluation of learning outcomes achievement.

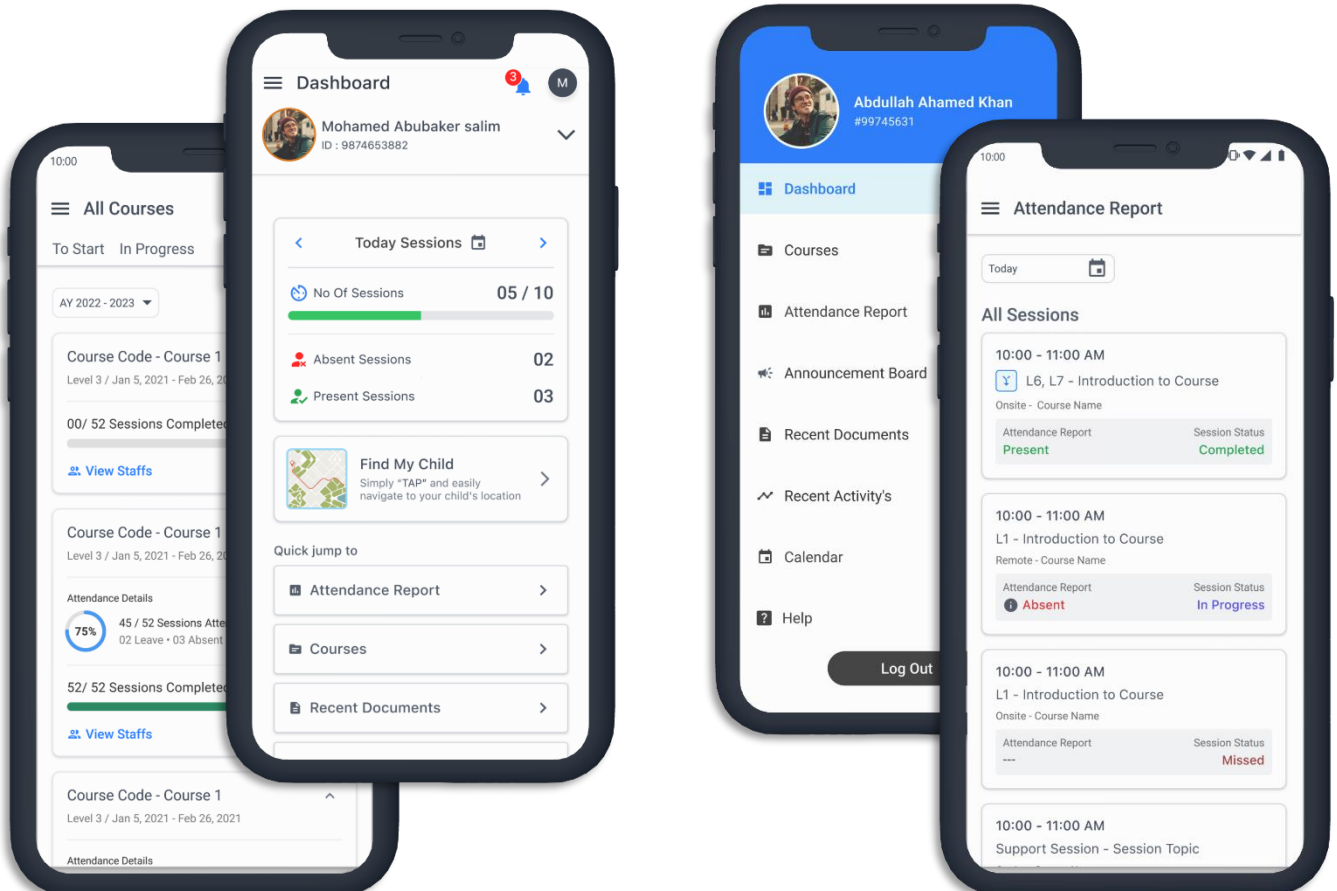

## DigiClass – Connect

Empowering Parents on Inspiring students to shape brighter Futures. Together we fuel Academic Excellence!

### How Does DigiClass Benefit Colleges and Universities?

- DigiClass Connect fosters a strong connection between parents and the institution, offering real-time updates on student learning progress.
- Empowers parents with accurate information to actively monitor and support their child's academic curriculum progress, fostering continuous learning.
- Empowers parents to monitor student attendance, fostering discipline and dedication in their learning journey.
- Helps parents understand the learning resources available to support their child's academic success.
- Provides parents with a holistic view of continuous assessment marks to track their child's academic progress.
- Enables real-time tracking and locates your child in emergency situations.
- Stay seamlessly connected with the institution, receiving real-time notifications and announcements.

What IMPACT it makes?

## ZERO-TIME

Spent on clerical activities related to attendance management, outcome calculations & identification of low performers.

# 30%

## How Does DigiAssess Benefit Colleges and Universities?

DigiAssess helps colleges and universities to conduct high standard and quality assessments. It simplifies the assessment preparation for onsite and remote exams without compromising exam integrity.

It makes your exams more innovative, secure, quality, valid, & reliable. It converts the cumbersome process of reports and analytics into doable and straightforward for anyone.

- Personalized digitalization process of assessment management
  - Question's preparation & review
  - Personalized Assessments
  - Scheduling of assessments
  - Conduction and monitoring of assessment
  - Onsite / Online Assessments (with remote Artificial intelligence-based proctoring)
  - Grievance and Curve up for students' degrees
- Outcome-based data insights on the assessment (measurement of program learning outcome happens in one click)
- Intelligent and Secure Question Bank with import and export options. (The administration can filter assessment items based on students' performance)

The commonly encountered challenge in higher educational institutions around the globe is "**student assessment**". Assessment is not only the fundamental aspect of instruction. Still, it is also the mirror that reflects students' learning and achievement of learning outcomes, reflecting the institution's mission. Planning, implementing, monitoring, and evaluating assessments become even more challenging and complicated with many students. In an era of increased accountability, remote learning, maintaining exam integrity and security is crucial. To achieve this, you need software to make assessment simple and secure, and that is DigiAssess.

What can DigiAssess do?

DigiAssess – Makes your assessment more innovative, secure, quality, valid, & reliable. It converts the cumbersome process of reports and analytics into doable and straightforward for anyone.

How does it work?

	<b>NO IMPOSTERING AND CHEATING</b>	Face verification? Multi-step Authentication?	
	<b>ONSITE AND REMOTE EXAM</b>	Review of Questions? Proctoring Intelligence?	
	<b>PROCESS AUTOMATION</b>	Workflow as per college? Smart Question Bank?	
	<b>RESULTS &amp; REPORTS</b>	Outcome based? Item Analysis & KPIs??	

## DigiAssess unique features and specifications

**Automation in the assessment management according to Institution Processes!**

The extensive database provides a rich platform for data storage giving access to documentation related to assessment at fingertips to minimize the efforts needed to identify student learning gaps and maximize learning assurance.

**Able to conduct the assessment with minimal internet**

Secure assessment and exams are conducted without the internet to prevent the electronic sharing of questions. It uses the internet only during login and submission.

**Curve-up and Measuring students learning outcomes made simple**

Institutions can do a direct and indirect measurement of learning outcomes for each course and program. In addition, analytical feedback can be used as an input for reviewing and modifying students' scores and grades for each exam conducted in DigiAssess.

**Impostering is impossible due to the face recognition system**

Instant login via face ID eliminates any malpractice and minimizes the possibility of fraudulent, illegal, or proxy test-takers. With this fool-proof facility, DigiAssess offers credible and reliable data.

## Focus on the assessment's fundamental principle of fairness with total security

Educational institutions must conduct a fair evaluation of all students. DigiAssess enables this by offering a secure environment through digital assessment. The users can register with their face as ID. DigiAssess restricts multiple logins from users to prevent malpractices. Furthermore, it conducts the exam without the internet; it is used only during login and submission.

## Ensuring the validity of assessments and questions mapping

DigiAssess helps colleges maintain the quality of the exam items in many ways. First, it maps the questions with the course and program learning outcomes, Bloom's Taxonomy, and Norman Webb's Depth of Knowledge. Second, it ranks questions based on difficulty. All this ensures that the questions are unique and relevant.

## Question bank management

Every institution has a question bank that DigiAssess manages efficiently. First, it helps faculty to prepare, review, and publish the questions after approval. Second, it enables subject experts and educationists to review the questions using a default checklist. Finally, it assigns questions to students based on their performance.

## Total exam integrity

DigiAssess reduces the chances of copying. It protects exam questions from electronic copying by locking the user's devices. In addition, each login gets a random set of blocks and questions to prevent memorizing questions. As soon as the exam starts, it blocks internet access to avoid the sharing of questions.

## Analytics and reporting to keep an update of course and program content

DigiAssess helps universities analyze the performance of both courses and students. It conducts polls and surveys to gauge the course performance. Use DigiAssess analytics feedback to review and modify the Curriculum to match the latest education trends and continuously improve it. The extensive database provides a rich platform for data storage giving access to documentation related to assessment at fingertips, solving another major problem in document control for national and international accreditation.

## Smart security of assessment

DigiAssess does encryption and decryption of assessment papers for complete security. It saves the answers at once and stores them for retrieval. In addition, it customizes the scores and issues reports.

*DigiAssess uses analytics to track a student's performance on an individual basis. It gives timely and instant feedback to improve the student's scores. Using these analytics, colleges can identify the outcome gaps of students and help them. DigiAssess helps in reducing college dropout rates and poor performance using these analytics.*

## What IMPACT it makes?

### ZERO-TIME

Spent on clerical Activities related to scheduling of exams, allocation of students on test centers & exam attendance management.

### FEW CLICKS

To complete course and program level outcomes calculations, comparison of direct and indirect measurement of learning outcomes and report analysis

### ZERO DEPENDENCY

For experts to analyse the quality of items due quality process automation

INCREASE

in operation efficiency due to processing of results within one hour of exam completion

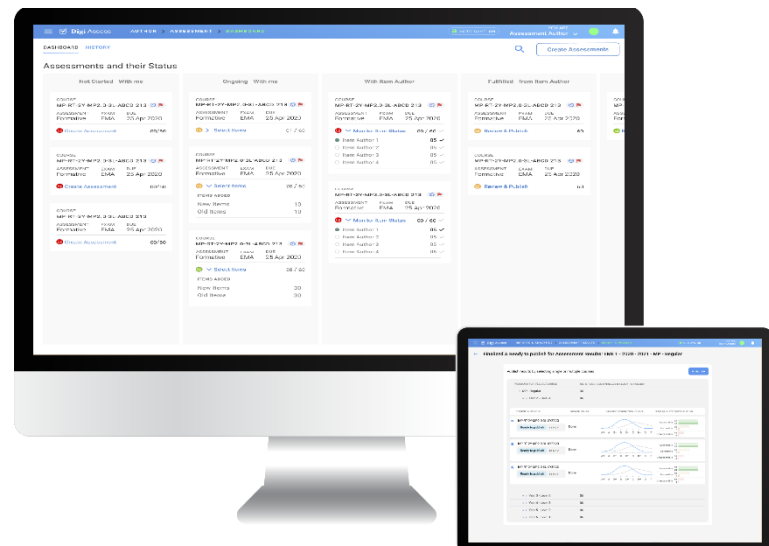

**50%**  
INCREASE

in the utilization of infrastructure & reduction of expenditure cost in exam conduction

**80%**  
REDUCTION

in technician dependencies due to auto-checking of test center preparedness

Increase efficiency with  
 **DigiAssess**

More Information  
about Digival

## Why DIGIVAL IT Solutions?

Digival is a technology company founded by grit-driven, experienced strategists, quality assurance consultants, academicians, physicians, and technical experts. Our mission is to transform educational institutions, ensuring their relevance in the present and future digital world. We achieve this by providing them with relevant, personalized, appropriate, and cost-justified products, solutions, and training. Our entire team is guided by Digival's core value: 'Empathic Concern.' We firmly believe that these values are pivotal in aligning our team with Digival's vision, mission, and goals.

The digital transformation of educational institutions is inevitable and entails significant changes, reforms, and adaptability. Therefore, the suitability of technology products and solutions becomes crucial. Unfortunately, research shows that most technology products and solutions often force institutions to adapt and fit into their systems, resulting in friction, dissatisfaction, and poor user experiences.

Digival's products and solutions are built with empathy at their core. Our development, implementation, and ongoing improvement processes are deeply consultative and iterative, guided by our core value of 'empathic concern.' We tailor technology solutions to provide personalized experiences.

In our personalization efforts, Digival considers all stakeholders, including academicians, students, administrators, parents, accreditation agencies, regulatory bodies, and more. We develop personalized, tailor-made products and solutions that align perfectly with the needs of educational institutions, ensuring the best client and user experiences. This is how Digival facilitates a smooth and exceptional digital transformation journey for educational institutions.

Digival's product portfolio, such as DigiClass and DigiAssess, offers unique personalized academic solutions. These solutions empower educational institutions to enhance their programs and courses, ultimately enabling students to achieve their learning outcomes.

Our completed projects have garnered the pride of our clients. Here, we share the experience of one of our clients, **Ibn Sina National College for Medical Studies**, and quote the words of **Dr. Abdulaziz Al Yahya**, Vice Chairman of the Board of Trustees, Chairman of the Quality Assurance Committee, and Vice Dean of the Clinical Pharmacy Program.

*"...in the DigiAssess and DigiClass, the software adapts to the institution process and workflow. The Digival's team makes sure the software fits exactly to the Ibn Sina National College. The team provided extraordinary timely support and actively engaged in solving the internal technical issues related to the College's digital ecosystem to overcome the implementation challenges without mentioning it as the client's issue, which is an appreciable action of empathy. Such extended empathetic services are needed for educational institutions to achieve digital transformation outcomes successfully".*

We look forward to integrating our products and collaborating with colleges and universities to enhance the quality delivery of programs and increase the achievement of students' learning outcomes.

with regards & yours sincerely  
DigiVal Team

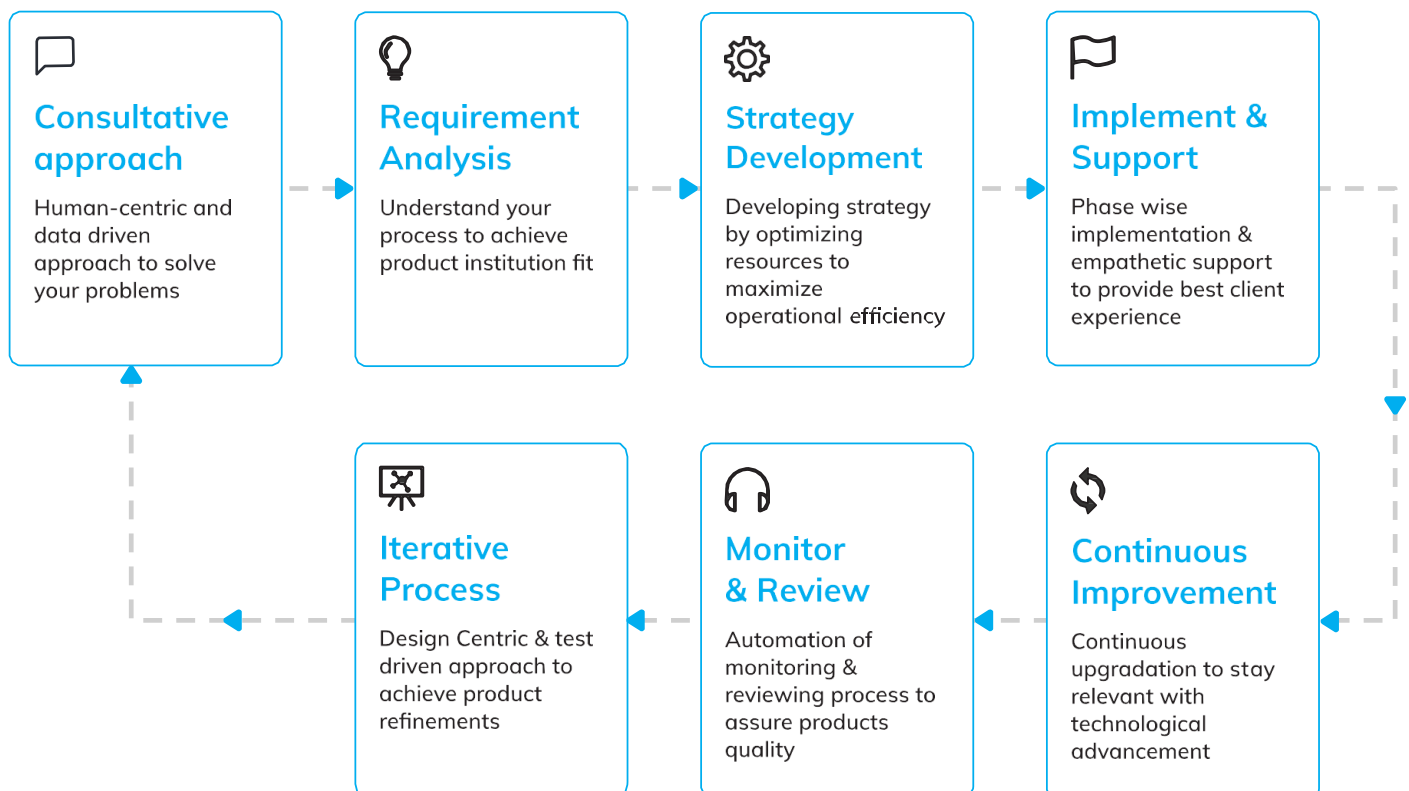

## How Digival matches the client's expectations?

We promise our clients that we will satisfy them by personalizing digital transformation that fulfils their requirements. Therefore, all Digival team members work to focus on the below key areas of client expectations.

## How does Digival work with the client?

## What did our clients say about us?

**Dr. Rashad H H Al Kashgari, Dean, Ibn Sina National College for Medical Studies**

Digival is a team of educational and technology experts, able to provide tailor made solutions for higher educational institution at a justified cost. Digival's uniqueness lies in personalizing technology according to the institutional process. In most of the technology providers, the institution must adapt to their software, which is highly painful and leads to implementation failure. In DigiAssess, DigiScheduler and DigiClass, the software adapts to the institution process, workflow and provides exact fit to the Learning, Teaching, and Assessment process of Ibn Sina National College for Medical Studies. The Digival's executive and client relationship division provides personalized continuous support in all stages of implementation, which is essential and critical for making the digital transformation successful.

**Dr. Abdul Aziz Al-Yahya, Vice Dean, Clinical Pharmacy Program & Chairman of Quality Assurance Committee, Ibn Sina National College for Medical Studies**

Digival has subject matter expertise to understand the institution needs and ability to customize the technology. Digival adapted and implemented our requests and I really recommend their solutions.

**Dr. Mounir Boughoula, Director of Planning & Quality, University of Prince Mugrin**

We are happy to get Learning Management Solution & Quality Management Solution together as an Answer to our prayers with DigiClass and DigiAssess.

**Dr. Mohamad Almisher Aljebreen, Vice President, Academic Affairs, Prince Sultan University**

Redesigned and developed the campus mobile application for Prince Sultan University to be in-line with the trending technologies and enrich user experience.
